

# TazQuickVerify™

Verifications Made Easy

## TazQuickVerify™

TazQuickVerify™ offers a seamless, natively integrated, and electronically delivered verification request. Eliminate all the unnecessary delays, while saving time by emailing the verifier. Ensure consistency and accuracy of your verification process by leveraging the power of TazQuickVerify.

**Eliminate manual verifications**  
**Leverage the power of TazQuickVerify**

## The Power of TazQuickVerify™

TazQuickVerify™ is a standard feature in TaWorks™ Software and can be used with five search types; reference, employment, personal, professional, and residence verifications. The user simply selects the search for a verification and TazQuickVerify automatically delivers an email directly to the verifier. Once they accept and complete the questionnaire, the verification is complete and the information is automatically populated back into the verifier's record. If you are worried about your request getting lost in their inbox, TazQuickVerify has you covered. Reminder emails are sent to the verifier once a day for 5 days and if the verification isn't completed within the allotted time frame, it will simply expire.
